ANTON MURDO

... a single word, *Stress*.

ZILINA

Chen, and others (1999) demonstrated that the prevalence of *S. typhi* in the blood of patients with fever and headache was 100% (10/10) in China, 90% (9/10) in Thailand, 80% (8/10) in Vietnam, 70% (7/10) in Cambodia, 60% (6/10) in Laos, 50% (5/10) in Myanmar, 40% (4/10) in India, 30% (3/10) in Sri Lanka, 20% (2/10) in Bangladesh, 10% (1/10) in Pakistan, and 0% (0/10) in the United States. The authors concluded that the prevalence of *S. typhi* in the blood of patients with fever and headache was significantly higher in the tropics than in the temperate zone. This finding is consistent with the results of the present study, which showed that the prevalence of *S. typhi* in the blood of patients with fever and headache was 100% (10/10) in the tropics and 0% (0/10) in the temperate zone.

Okolie Žiliny - Drevený násten v Trnove

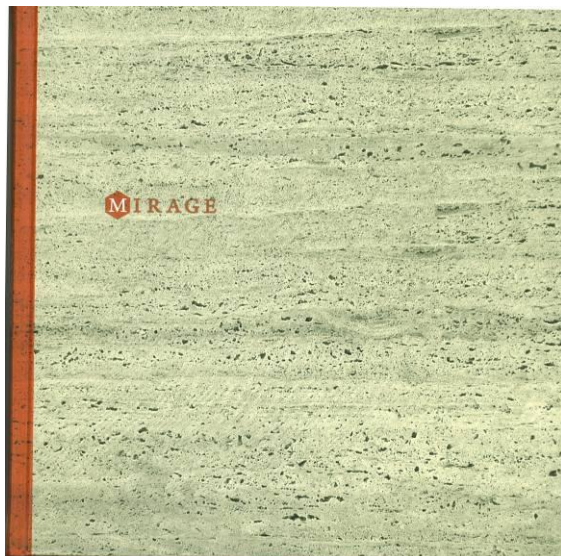

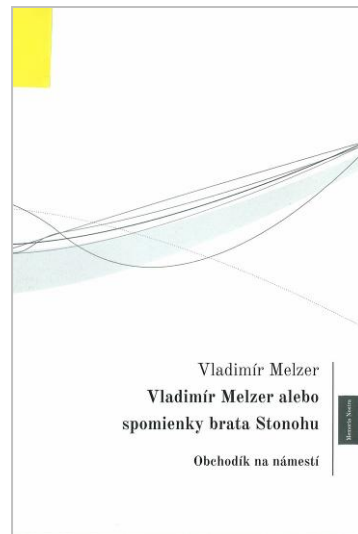

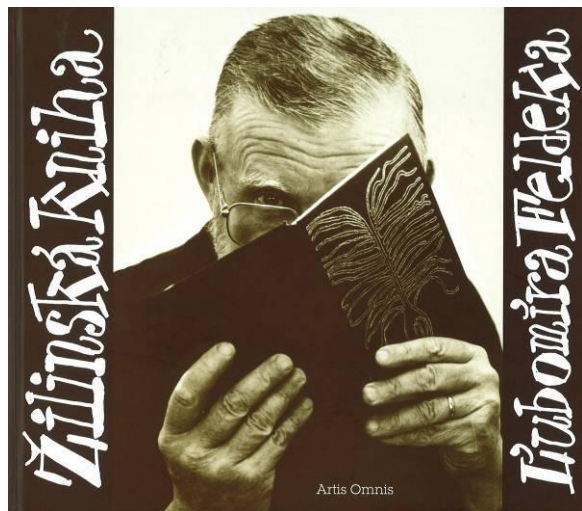

TRNOVÉ
monografia obce

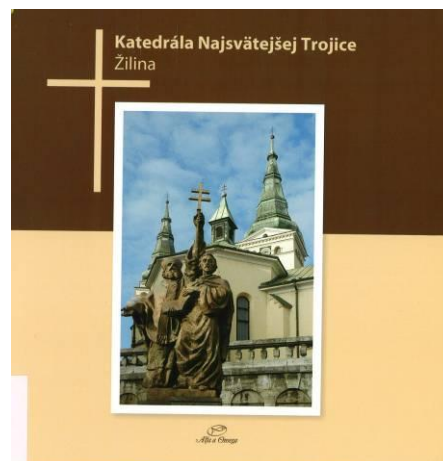

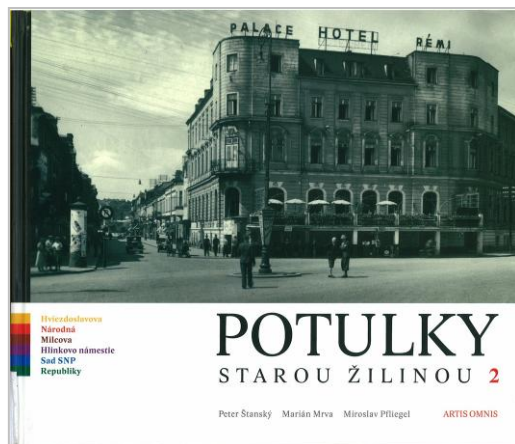

Najstarou pohľadnicou dreveného nástenka v Trnove je z roku 1921. Kedy bol kostol postavený, nie je známe. Isté však je, že v roku 1587 bol stĺp – nástenka a tým posvätnou relikviou. Starobylá iba TRNOVÉ (TRNO) – prvýkrát spomínané v listine z roku 1393) tak dostala svoj symbol, ktorý používala aj na poštových známkach. Drevený Kostol na Jarine v Trnove má dohady z jedného pamätníka nášho Žilinského kraja.
